

IB Physics – Year Two – Summer Assignment

Locate this page on from the summer assignment drop down menu on my website

Summer Assignments for IB Physics 2

*****Please See Mr. Gray before summer for a FREE journal*****

If you are going into IB Physics 2 this coming fall:

1. Obtain a graph composition notebook journal and set it up as follows. Put your name on the outside, and inside covers, put the title, “Graded Assignments” on the top of the first page and break it into four columns (One wide, three narrow). Item, Page Number, Student Grade, and Teacher Grade. Number the front and back of the first 20 pages, so you have up to 40 numbered pages. Go to page 6 and label the top of it “Physics Phormulas”, this is where you will write down all the formulas we will use in physics this year. Turn to page 8, and fold it down into a triangle.

2. Use the IB College Textbook link below to help you answer the summer assignment questions. The questions themselves are contained in the link "IB Questions". Complete this work on page 10 of your journal.
